Subject Index, Volume 10, 1993

Aging
- Age-related changes in GH and IGF 237
- Age-related changes in GH secretion and metabolism 249

Avian
- GH control of high levels of T_3 in 55
- Hepatic GH receptors in 199
- Fibronectin deposition by granulosa cells 219
- IGF in growing medium and heavy weight 267

Bovine
- Catecholestrogen effects on corpora lutea in 95
- Cloning of the GnRH receptor 335
- Concentrations of placental lactogen across gestation in 67
- Continuous GnRH on LH and testosterone in 179
- Estradiol\progesterone and insulin on immune function in 31
- Feed restriction and somatotropic axis in 315
- Immunization against GRH in 315
- Inhibin mRNA in ovarian tissue 207
- Inhibin production by cultured granulosa cells 289
- Insulin response to glucose in lactation in 191
- Norgestomet action as a progestagen in 21
- Thyroid status and IGF response to GH 71
- Tissue response to insulin in lactation in 191
- Variants of GH, gene frequency in dairy breeds 325

Canine
- Estimate of free cortisol in 45
- Age related concentrations of GH and IGF in 237

Catecholestrogen
- Influence of, on short-lived corpora lutea 95

Cortisol
- Estimation of concentrations of free 45

Deiodinase
- GH controls high levels of T_3 by reducing 55

Dexamethasone
- Adrenocortical suppression tests in horses 1

Endometrium
- Secretory protein changes from, with uterine receptivity 117
- Steroid metabolism by the equine 229

Epinephrine
- GH treatment, effects of challenge with 103

Equine
- Starting time on dexamethasone suppression tests in 1
- Conceptus steroid synthesis 229

Estradiol
- Changes in inhibin and, in healthy and atretic follicles 127
- Feedback control by, effects on indomethacin 15
- Inhibin regulation by 289
- Model of receptor action 159
- Season and, effects on brain histamine 159

Fibronectin
- Deposition by chicken granulosa cells 219
- Follicular maturation and cyclic AMP on deposition of 219

Follicle Stimulating Hormone
- Concentrations of, and inhibin in prepubertal ewes 87
- Inhibin regulation in cultured granulosa cells 219

Gene, gene expression
Cloning of the bovine GnRH receptor 335
Inhibin mRNA in ovarian tissue 207
Variants of growth hormone in dairy breeds 325

Glucose
Effects on insulin release in lactating cows 191

Gonadotropin Releasing Hormone
Cloning of the receptor for 179
Continuous administration of, on LH and testosterone 3
Ovarian inhibin gene expression, effects of 207

Granulosa Cells
Fibronectin deposition by, effects of follicular maturation 219
Inhibin production by cultured 289

Growth Hormone
Age related changes in, in dogs fed different diets 237
Age-related changes in, secretion and metabolism 249
Control of high levels of T_3 by 5
Feed restriction and GRH immunization on 315
Glucose, insulin, epinephrine challenges, effects of 103
IGF, IGF-BP2 and, in lean and obese swine 257
Receptor for, in chickens selected for feed conversion 199
Receptor for, in chickens selected for weight gain 199
Thyroid status on IGF response to 71
Variants of, gene frequency in dairy breeds 325

Histamine
Effects of season and estradiol on brain concentrations of 7

Immune System
Effects of estrogen\progesterone and insulin on 31

Indomethacin
Effect of, on estradiol feedback control of LH 15

Inhibin
Estradiol and, in healthy and atretic follicles 127
Follicle stimulating hormone and, in prepubertal ewes 87
mRNA in bovine ovarian tissue, effects of GnRH 207
Steroids and FSH effects on granulosa cell production of 289

Insulin
Diet and heat effects on release and actions of 279
Effects on immune function 31
GH effects on challenges with 103
Responsiveness to glucose in lactating cows 191
Tissue response to, in lactating cows 191

Insulin-Like Growth Factor
Age-related changes in, effects of different diets 237
Effect of thyroid status on GH stimulation of 71
Feed restriction and GRH immunizations on 315
GH and IGF-BP2 in lean and obese swine 249
Sex and growth rate on plasma 267

Insulin-Like Growth Factor Binding Protein
GH, IGF and, in lean and obese swine 257

Lactation
Effects of glucose on insulin during 191
Gene frequency of GH variants, correlation to 325
Tissue response to insulin during 191

Luteinizing Hormone
Continuous administration of GnRH on 179
Indomethacin effect on estradiol feedback control of 15

N-methyl-Aspartate
Modulation of pituitary hormone release 305

Obesity
GH, IGF and IGF-BP2 in 257

Ovarian Cysts
Factors contributing to formation of induced 141

Ovary
Follicular maturation and fibronectin deposition 219
Inhibin mRNA in 209
Inhibin production by cultured granulosa cells 289

Ovine
Diet and heat exposure on insulin in 279
Endocrine and endometrial secretory protein changes 117
Indomethacin effect on estradiol feedback on LH 15
Inhibin and FSH in prepubertal 87
Season and estradiol on hypothalamic histamine in 7

Placental Lactogen
Concentrations across gestation 67

Porcine
Age related changes in GH secretion and metabolism 249
Experimentally induced ovarian cysts in 141
GH effects on glucose, insulin, epinephrine challenges 103
GH, IGF and IGFBP-2 in lean and obese 257
Inhibin and estradiol in healthy and atretic follicles in 127
Opioid peptides and pituitary hormone release in 305

Progesterone
Basis of Norgestomet action in cattle 21
Estrogen and, effects on immune function 31

Receptor
Cloning of the bovine GnRH 335
GH, in chickens selected for feed conversion, weight gain 199
Model of action of estrogen 159

Season
Estradiol and, effects on brain histamine 7

Somatotropin (see Growth Hormone)

Testosterone
Continuous administration of GnRH on 179
GnRH receptor gene expression, effects of 335

Thyroid
Relationship of the, to somatotropic axis 71

Triiodothyronine
Control of high levels of, effects of GH on 55

Uterus
Endocrine and endometrial secretory protein changes 117
